

# Want to use film to promote water and earth science education?

## Host a **Let's Talk About Water** event on your campus or in your community!

LTAW is designed to bridge the paths of communication between scientists, students and the broader public community. A specially chosen program of films serves to engage and make accessible questions of water, while expert panel discussions bring perspective and focus to the film topics.

## Apply for CUAHSI's LTAW Challenge Grant Program!

CUAHSI matches funds raised by the university (up to \$3,000).

Application period will open in the Fall.
